Cemtop XD
 Nitoprime 330

In Prestons, NSW, Fosroc's Cemtop XD gave Primo Foods a fast, durable flooring solution that stands up to forklifts and cold storage demands.

THE PROJECT

Primo Foods required resurfacing works at their cold storage warehouse in Prestons, NSW. Through everyday wear and tear, the main forklift thoroughfares had become rough, uneven and required a fast-turnaround solution to restore durability and a smooth finish without extended downtime.

THE SOLUTION

Fosroc's Cemtop XD was selected for its fast application and early trafficking properties, ideal for a refrigerated food storage environment.

Substrate preparation included grinding of worn concrete surfaces.

Surfaces were primed with Nitoprime 330 to ensure adhesion.

Cemtop XD was applied in a single pass using a continuous mix pump to a thickness of 6–12mm.

The system allowed for foot traffic within 24 hours and forklift traffic after full re-commissioning of refrigeration.

THE BENEFITS

- Rapid installation with minimal warehouse downtime
- Excellent durability under heavy forklift traffic
- Smooth, level finish for safe operations
- Suitable for cold storage environments
- High early strength with long-term abrasion resistance
- Non-dusting, hygienic surface – ideal for food storage facilities
